DESCRIPTION

The GB743 series are pneumatic-hydraulic tools designed specifically for the efficient installation of a wide range of blind rivets. They can be operated in any position with one hand. They have a rated pull load of 4200 lbs. (18.68 kN) with 90 psi (6.2 bar) air pressure at the air inlet.

The GB743SH and GB743SR riveters offer a unique "split" system providing the operator with an ergonomic tool with reduced hand held weight, as shown below. The GB703SH comes with 8 feet of hose and the GB703SR comes with 3 feet of hose.

The GB743 series riveters operate on a wide range of air pressure, with 90 to 100 psi (6.2-6.9 bar) providing the maximum efficiency. At 90 psi (6.2 bar) air pressure, the GB743 series does not exceed 81.5 dB (A) and consumes 3 cfm at 20 cycles a minute.

Unless ordered rivet specific (I.E. GB743/4N), the GB743 series riveters are furnished with nose assembly 8N-743A-24 and spare nose tip 10204 to convert to 6N-743A-24. All other nose tips must be ordered separately. When ordering tool rivet specific, contact Gage Bilt for more information.

"VT" riveters are not furnished with the nose assemblies above and must be ordered for your specific rivet.

OPTIONS

The GB743 series riveters may be ordered with a vacuum system. Gage Bilt offers two varieties (see below)

Order GP743 series riveters rivet specific by adding the appropriate suffix (see selection chart).
